

COMBINED AEROFEEL® / TRUE WHIRLPOOL®

FOR PEARL SERIES BATHTUBS ONLY

TRUE WHIRLPOOL®

Lower yourself into a unique True Whirlpool bath, get comfortable, and turn on the strategically positioned whirlpool jets to create delicious streams of warm water that will relax your body and clear your mind. Feel the soothing swirl of motion around you, creating a cushion of waves that relieves pressure on your joints and muscles. The turbulence and buoyancy of the warm water help ease discomfort and reduce muscle stiffness. Enjoy a more restful sleep after the water has washed away all your aches and pains and left you feeling completely and utterly refreshed.

(Backjets are sold separately).

FEATURES AND BENEFITS OF TRUE WHIRLPOOL

Pearl Series professional hydrotherapy action creates a soothing swirl of motion. Its patented jets use the Venturi effect to create more air bubbles that are uniformly sized and remain suspended in the water stream much longer, resulting in an enhanced massage experience.

Powerful jets circulate up to 30 gallons of water per minute.

WHY TRUE WHIRLPOOL IS THE MOST HYGIENIC WHIRLPOOL SYSTEM

Jet Check Valve

1. Pearl Series Jet Check Valve Technology

The Venturi jet includes a check valve helping to prevent water from entering the air tubing of the system which could lead to bacteria build-up.

2. Complete Rinse Cycle

A complete rinse cycle can be performed on the True Whirlpool system in order to clean the piping.

3. Self-Drainage System

The True Whirlpool piping is installed for self-drainage ensuring that water does not remain in the system.

Okapi™

AEROFEEEL® (FOR ALL BATHTUBS)

Our perimeter air injection system is simply the best on the market. Aerofeel rides the wellness wave with individual quiet airjets and check valves providing immaculate purity. Intelligently positioned around the interior wall and in the tub's backrest, tiny openings create a gentle rippling massage, caressing your skin and cradling your body from head to toe. And to complete this therapeutic heaven, Aerofeel also includes an oval-shaped heated backrest—imagine a warm sensation across your shoulders and neck. Centre each of your senses through delightful relaxation and wellness.

FEATURES AND BENEFITS OF AEROFEEEL

A	36-59 perimeter quiet airjets with check valves intelligently positioned to provide a gentle rippling, caressing massage
B	Pre-warmed air pushed through an FDA (Food and Drug Administration) tube bringing you the most hygienic system on the market
C	Oval-shaped heated backrest providing you a warm sensation across your shoulders and neck. 5-6 airjets in the back
D	Drying cycle starts automatically 20 minutes after each bath session whether you use the system or not
E	Retro-lit digital control with electronic timer and multi-speeds, water detector safety block, temperature detector and 2-3 memory settings for personalized massage action
F	Gentle, cradling massage for total body experience and up to 35% quieter than competitive systems

A Retro-Lit Digital Control:

- A display screen that provides information such as water temperature, the remaining massage time, the water level and a control for the various therapies
- A therapy memory function with up to three memory keys that allow you to set your preferences for your next baths
- Control of massage time
- Control of massage intensity

COMBINED SYSTEMS

- Hydrofeel/Aerofeel on Urban, Optik, Ailki and Aigo series
- Hydromax/Aerofeel

Roll the benefits of both systems into a single one at the same time, drawing on both the power of water and the mildness of air to give you all the therapeutic benefits any bath could ever provide. The best of both worlds.

HOW AEROFEEEL WORKS

Perimeter air system by MAAX: **Technology. Hygiene. Purity.** MAAX perimeter air system incorporates the most hygienic and quietest design on the market by far, relying on three key components developed by our engineers to ensure a most exhilarating experience of wellness.

FEATURES AND BENEFITS OF PERIMETER AIR TECHNOLOGY

1. Advanced check valve technology

The quiet air injectors used in our perimeter air system feature a check valve system to ensure water does not flow back into the system. When air is pushed through the airjets, the valve is opened, and a relaxing ripple effect is created in the tub. When the air blower shuts off, the valve activates, preventing backflow of water and keeping the system dry.

Soothing oils and even exotic mud bath preparations can enhance your daily massage session.

2. Automated drying cycle

The system's automatic drying cycle activates 20 minutes after each bath session (whether the system is used or not), purging any water droplets that may be left on the outside of the air injectors, limiting deposits.

The reliable technology behind MAAX systems ensures that you enjoy a hygienic, gentle and relaxing massage.

3. FDA-approved feeding tube

Non-porous, waterproof piping is used to distribute air to the injectors. Compliant with strict U.S. Food and Drug Administration standards, the pipe material guarantees an immaculate interior environment that prevents bacteria from lodging in any porous walls.

All this means that both the safety of your system and your massage experience can be summed up in one word: perfect!
