

IES | MAAX IES®

FOR SELECT SHOWERS

Developed with the help of massage therapists, the MAAX IES (Integrated Energizing System) is designed to deliver a truly energizing shower experience. All of its plumbing components, including the body jets, come factory installed, ensuring optimum configuration and operation, plus easy installation. Available on all shower models except Urban 7242 SA, Urban 6036 SA and Exposé.

MAAX IES 1/2

MAAX IES 3/4

BODYMAX

The Bodymax body jets are strategically positioned to target key zones of your back: the upper back, midback and lumbar areas. The trapezius muscles in the shoulders enjoy a misting, lower-pressure massage from two soft water jets, while four stronger pulsating jets provide the remaining parts of your back with deeper, more penetrating massage action. When equipped with MAAX IES 3/4, your shower system delivers a more complete massage experience thanks to two additional pulsating jets directed at the legs. Bodymax is just what you need to stay energized all day long.

Standard Features MAAX IES 1/2	6 adjustable body jets (2 misting gentle-massage and 4 pulsating) Solid-brass jets
Standard Features MAAX IES 3/4	8 adjustable body jets (2 misting gentle-massage and 4 pulsating for the back; 2 pulsating for the legs) Solid-brass jets

*Leg jets only available with MAAX IES 3/4

BACKJETS

MAAX IES features Backjets, just what you need when you want to soothe aching muscles and release tension after a long day. A strategic configuration of microjets delivers effective back and shoulder massage. Showers fitted with MAAX IES 3/4 offer more complete massage via four additional jets that provide soothing relief to the neck and calf muscles—a breakthrough in shower massage systems. Sitting comfortably in the shower— what a great way to get rid of even the most nagging pain.

Available on Imagine and Stamina shower models.

Standard Features MAAX IES 1/2	10 rotating microjets
Standard Features MAAX IES 3/4	14 or 16 microjets (10 or 12 for the back, 2 for the neck* and 2 for the calves) * Not available on Imagine Shower

MAAX IES 3/4

THERMOSTATIC VALVE

The thermostatic valve guarantees ideal water temperature at all times. It is also equipped with a safety-lock button to ensure the water temperature remains below 100°F (38 °C). On models with MAAX IES 3/4, you can activate the system of your choice: Bodymax alone, or Bodymax in combination with the Rainmax, hand shower, showerhead, Backjets or wall spout to bring invigorating massage to one or more parts of the body at once. For a shower experience that's fully energizing, and safe too.

Standard Features MAAX IES 1/2	Regulates water volume and maintains water temperature
	Safety lock keeps temperature below 100°F (38°C)
Standard Features MAAX IES 3/4	Two handles = One to adjust the temperature and one to select the options (with one diverter), namely the Bodymax system as well as the back jets, hand shower and water tester.
	Three handles = One to adjust the temperature; one to select the options (with one diverter), namely the back jets, Rainmax system (not available on all showers), hand shower, showerhead and water tester; and one to activate the Bodymax system (with one diverter).

MAAX IES 3/4

HAND SHOWER

All MAAX IES factory-assembled showers include a practical, state-of-the-art hand shower with flexible hose, self-cleaning spouts and three jet settings. The hand shower is height-adjustable, making it easy for the whole family to enjoy.

Standard Features MAAX IES 1/2 & 3/4	3 modes: Rain, Aqua Soft, Aqua Massage
	27-in. adjustable rail
	69-in. flexible hose
	Self-cleaning spouts
	Extra hand shower holder

SHOWERHEAD

The MAAX IES 3/4 system features a one- or triple-function showerhead that adjusts to any height or angle. When bracketed to the roof cap, it enables effective vertical massage. When combined with Bodymax, its energizing benefits are more complete since the jets are directed toward all parts of the body. Think of it as luxury in the palm of your hand.

INSTALLATION

Installation is simple, requiring only hot- and cold-water hookup. The new MAAX IES is compliant with IAPMO standards.

The minimum static pressure required to operate the IES system efficiently is 50 lbs/in².

Hot and cold water hookup

WATER TESTER

This practical little accessory lets you safely check the water temperature before you activate the hand shower unit. It is also handy for washing your feet or cleaning the shower floor.
